

AUSCAN

Auscan is your hands-on, experienced, and customer-focused Occupational Health & Safety (OH&S) and Emergency Services provider. We support our clients through the development and implementation of rigorous yet tailored and sustainable solutions. Health, physical and mental, are the cornerstone of a high-performing team. Auscan helps client teams be the best – and the safest – they can be by looking at the whole picture.

+ EMERGENCY MEDICAL SERVICES

Emergency Medical Services (EMS) provide treatment to those at site in need of urgent medical attention (pre-hospital) and transportation to a health care facility as required. EMS provided on site includes:

- First Aid
- Primary and Advanced Care Paramedics
- Advanced trauma and cardiac life support
- Deployment for optimal response at the job site with stabilization and recovery to site health facilities
- Transportation to on-site Health Centre or provincial health care facilities as required

+ OCCUPATIONAL HEALTH

Occupational health services are intended to provide timely and appropriate medical care & disability management services specifically for occupational injuries or illness. Services that are provided include:

- Assessment, treatment, monitoring & support of occupational injury or illness
- Additional occupational health services such as:
- Disability management (assessment of medical factors and medical management)
- WCB and H&S reporting
- Fitness for duty, and work restrictions
- Referrals to provider network for disability related examinations/treatment
- Periodic health assessments (audiometric testing, pulmonary function tests, Eye exams etc.)
- Biological monitoring
- Alcohol and drug testing & education
- Occupational medical surveillance
- Workplace vaccinations programs (e.g. seasonal influenza)
- Supporting Client programs
- Ergonomic assessments
- Liaison with external medical profession
- Care and control of Medical Equipment (Maintenance/ Calibrations)
- Pre-Employment Medical Assessments (PEM's)

+ SAFETY

- Onsite safety professionals.
- Full Safety programs
- Customized Health and Safety Manuals
- Internal and External Audits
- Investigations
- Manual Review and Development
- Inspections

+ MEDICAL STAFFING

We focus on providing high-quality healthcare talent to remote and northern communities and projects across Canada.

Our team's extensive experience providing emergency, primary and occupational health staff across Canada, combined with our first-hand knowledge living and working in remote communities means we understand the dynamic nature of our clients.

All Medical personnel will be thoroughly screened and vetted to ensure provincial and regulatory practice requirements are met. We are committed to service excellence with all of our partners, by maintaining and adhering to all mandated industry policies and practices

+ PRIMARY CARE

Primary care is the health service that focuses on the diagnosis, treatment and management of care for non-occupational illness and injury at site. Health care management for nonoccupational disease or conditions such as, but not limited to:

- Chronic or emergent Cardiac Disease (e.g., High Blood Pressure, Heart Attack, Stroke, Arrhythmia)
- Chronic and emergent Respiratory Disease (e.g., Asthma, Respiratory Infections, Allergies)
- Metabolic Disease (e.g., Diabetes Type 1 & 2)
- Environmental and Seasonal Illness (e.g., Influenza, Heat/cold exposure, Allergies)
- Skin disorders (e.g., eczema, dermatitis)
- Musculoskeletal disorders (e.g., arthritis, tendonitis)
- Communicable disease (e.g. COVID-19, influenza)

+ FIRE + RESCUE

- Mine Rescue and emergency Response Teams
- IFSAC/ProBoard certified Fire Fighters
- Training staff for emergency related activities.
- Consult and advise on Emergency Preparedness
